MUNISH

Full-Stack Developer | AI / Generative AI Engineer

+91-7986710498 | munishkanojia999@gmail.com | linkedin.com/in/munish981 | GitHub | Connect

PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering student (Class of 2027, CGPA 9.0/10) with hands-on experience in full-stack development - frontend development with React/TypeScript, backend development with Node.js/Express and REST API integration, and MySQL/MongoDB/Firebase data layers - extended into Generative AI: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Gemini API integration, and prompt engineering. Built 8+ responsive, end-to-end web and AI applications spanning authentication, payments, and data visualization, with select projects deployed on Render and Vercel. Seeking an entry-level Full-Stack Developer or AI/Generative AI Engineer role.

TECHNICAL SKILLS

Programming Languages: Python, C, C++, JavaScript, TypeScript, SQL

Full-Stack Development: React.js (Vite), Node.js, Express.js, REST APIs, Frontend Development, Backend Development, Responsive Web Development, Progressive Web Apps (PWA), HTML5, CSS3, Tailwind CSS

AI / Machine Learning: Artificial Intelligence, Machine Learning, Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Computer Vision, Prompt Engineering, Gemini API

Data & Visualization: Exploratory Data Analysis (EDA), Data Preprocessing, Data Visualization

Databases: MySQL, MongoDB, Firebase, Supabase, CRUD

Authentication / APIs: Google OAuth, JWT, Firebase Authentication, API Integration

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook

Cloud / Deployment: Cloudinary, Vercel, Render, Google Cloud

EXPERIENCE

Python & Data Science Intern **Jun 2025 – Aug 2025**

O7 Services, Jalandhar, Punjab

- Core Python + Data pre-processing and exploratory data analysis (EDA) on real-world datasets using Python.
- Built data visualizations with Pandas, NumPy, Matplotlib, and Seaborn to surface trends and support data-driven decisions.
- Documented analysis workflows and findings for handoff to the wider team.

Front Office Executive (Part-Time) **Jun 2025 – Dec 2025**

Ankur Kids Super Speciality Hospital, Jalandhar, Punjab

- Managed patient registration, appointment scheduling, and billing entries using hospital management software, coordinating with clinical and administrative staff to keep daily front-office operations accurate and running smoothly.

VIRTUAL EXPERIENCE / JOB SIMULATIONS

Jun 2026

- **TCS Forage – GenAI Powered Data Analytics:** performed EDA, risk profiling, and delinquency prediction using generative AI and predictive analytics concepts.
- **Johnson & Johnson MedTech Forage – Robotics and Controls:** diagnosed performance delays in surgical robotic arms and proposed design-optimization improvements.
- **Deloitte Forage – Technology:** completed applied coding tasks and structured problem-solving exercises in a simulated technology workflow.

PROJECTS

1. Mylo AI - AI-Powered Multi-Model Analysis Platform

React, TypeScript, Gemini API, Node.js, PWA

- Developed a full-stack multimodal AI platform combining **machine learning, computer vision (CNN-based image analysis), LLMs, RAG, and conversational AI** for clinical analysis, with **Progressive Web App (PWA) support** for an installable, responsive experience across desktop and mobile devices.
- Integrated the **Google Gemini API** for vision analysis, cellular region detection, bounding-box localization, and staging predictions.

2. 3D Card Studio - Interactive Digital Card Showcase & Ordering Platform

- Built an interactive **3D digital card showcase and ordering platform** for exploring personalized card designs and submitting customer requirements.
- Developed responsive **card-viewing and ordering workflows** optimized for desktop and mobile users.

3. E-Commerce Website
React, TypeScript, Node.js, Express.js, MongoDB

- Engineered a full-stack **e-commerce web application** - covering both frontend development (React/TypeScript UI) and backend development (Node.js/Express REST API) - with product browsing, cart, checkout, user accounts, and order management.
- Implemented **UPI QR payments** and an admin dashboard for orders, payments, and customers.

4. Physio Track Web Application - Client Physiotherapy Management System
Python, Streamlit, MySQL

- Designed and built a **Streamlit-based management system** for patient, exercise, treatment, and account administration workflows.
- Integrated **MySQL CRUD operations** for storing, retrieving, and managing application records and data workflows.

5. Health Lens Dashboard - Nutrition Analysis Platform
Python, Streamlit, MySQL

- Developed an interactive **nutrition analysis dashboard** using Streamlit and Pandas for filtering and comparing nutritional attributes.
- Built a **nutrition chatbot** integrating food-data APIs and AI-powered responses with analytical views for macronutrients, fats, and micronutrients.

6. Appu Fast Food - Full-Stack Food Delivery Web Application
React, TypeScript, Node.js, Express

- Created a **responsive, full-stack food delivery web application** with product catalog, order flow, delivery-zone validation, and coupon functionality.
- Built **REST APIs** for products, orders, delivery zones, and coupons with **UPI QR payments** and order notifications.

7. Vehicle Rental Management System
Python, Tkinter, MySQL

- Designed a desktop-based **vehicle rental management system** using Python and Tkinter for vehicle, customer, rental, and return management.
- Implemented **MySQL CRUD operations** for vehicle, customer, rental, return, and tracking records.

8. BRCS Master Esports - Tournament Management Platform
Firebase, AI-Assisted Development | In Progress

- Developing an **esports tournament management platform** for player registration, tournament management, match tracking, and results.
- Implementing **Firebase Authentication and database functionality** for user accounts, player profiles, tournament data, and application records.

EDUCATION

B.Tech, Computer Science Engineering **Expected 2027**
Lyallpur Khalsa College Technical Campus, Jalandhar | CGPA: 9.0 / 10

CERTIFICATIONS & ACHIEVEMENTS

1st Position - GENSPARK: Generative AI Workshop & Competition LKCTC

- Secured **1st Position overall**, emerging as the winner across **all rounds** of the GENSPARK Generative AI Workshop & Competition, competing with students from B.Tech CSE and Data Science programs.
- Demonstrated knowledge of **Python, C++, aptitude, Generative AI, AI applications, coding assistance, and automation** across the competition rounds.
